👤 Profile

3rd-year engineering student at ENSA Khouribga, specializing in Full Stack Development and DevOps, with hands-on experience delivering scalable web applications, automating business processes, and integrating real-time monitoring systems.

🎓 Education

Engineering Cycle in Software and Data Engineering, 09/2023 – present | Khouribga, Morocco
National School of Applied Sciences

Specialized training in data science, software development, and information systems engineering.

Program 42 (42 Curriculum), 1337 09/2024 – 08/2025 | Khouribga, Morocco
Innovative learning approach based on peer-to-peer learning and project-based pedagogy.

🧠 Skills

Languages: Java, C, Python, JavaScript, PHP, Matlab, Shell

Frameworks & Libraries: Spring Boot, Django, React.js, Node.js, Express.js, Bootstrap, Tailwind, Next.js

Databases: MySQL, PostgreSQL, OracleDB, MongoDB

DevOps & Tools: Git, Docker, Kubernetes, Jenkins, CI/CD, ELK, Linux, Postman, Swagger

Methodologies: Agile, Scrum, UML, Merise

📁 Professional Experience

Full Stack Developer - Internship PFA, Colas Digital Solutions 06/2025 – 08/2025 | Casablanca, Morocco

- Automated the entire multi-country, multi-currency payroll process.
- Developed backend (Spring Boot) and frontend (Next.js) integrated with HR Access.
- Built a KornShell orchestration script to centralize and secure payroll processing.
- Implemented real-time monitoring with ELK Stack.
- Applied Scrum methodology with Azure DevOps (sprints, backlog, tasks).

Impact: Significantly reduced manual interventions and improved process traceability.

📁 Projects

AI-Based Disease Prediction Platform

- Built a React (Vite) frontend for symptom input and real-time diagnostic results.
- Designed a Django API exposing a Random Forest model (accuracy: 91%).
- Implemented a Spring Boot microservice for account management (authentication, security).
- Integrated an AI chatbot via OpenAI API to assist users and explain results.
- Modeled and managed a MySQL database for users, symptoms, results, and conversation history.

Tools: React.js, Django, Spring Boot, MySQL, Random Forest, OpenAI API, Postman, GitHub

School Management Application

- Developed a Spring Boot REST backend for managing students, teachers, courses, and grades.
- Implemented Spring Security + JWT with admin, teacher, and student roles.
- Designed an optimized PostgreSQL schema.
- Created a React (Vite) frontend with dynamic forms.

Tools: Spring Boot, Spring Security, Spring Data, React + Vite, PostgreSQL

🎨 Extracurricular Activities

Design Lead, Rotaract ENSA Khouribga (2023/2024 – 2024/2025)

Responsible for creating visuals and designs for the club's events and projects.
